Soft Skills	Leadership, Clear Communication, Problem-solving, Stakeholder Management, Executive Reporting, Risk Mitigation, Conflict Resolution
Tools	Jira, Confluence, GitHub, Linear, Asana, Notion, Miro, Figma
Product and Strategy	Roadmapping, OKR alignment, Product discovery, Backlog prioritization (RICE/MoSCoW), User story writing and acceptance criteria, Release planning
Interests	Video Games, Traveling, History, Book Reading, Robotics, Technology, Quantum Mechanics

EXPERIENCE

Product Manager — Game Producer

Sep 2023 - Present

Revolving Games, Inc.

Lahore, Pakistan

- Own **end-to-end** lifecycle of core features from discovery through launch and iteration, aligning roadmap priorities with player engagement and business goals.
- Contribute to **roadmap planning** by evaluating scope, timeline, and resource trade-offs to maximize **player engagement** and delivery predictability.
- Lead sprint planning, backlog prioritization, and roadmap execution across **distributed cross-functional teams** in North America, South America, and Europe.
- Translate **product vision** into structured user stories, acceptance criteria, and milestone-based delivery plans.
- Manage technical dependencies across workstreams, proactively **mitigating risks** before impacting timelines.
- Lead **product discovery** through player feedback analysis, internal playtesting data, and stakeholder workshops to inform prioritization and release iterations.
- Provide **data-backed product insights** to leadership, influencing roadmap prioritization and release strategy.
- Contributed to growth of a large-scale Web3 product ecosystem comprising **700K+ cumulative game installs** and multiple interconnected titles.
- Standardize sprint tracking and **reporting dashboards**, improving delivery predictability.
- Collaborate within a **50+ cross-functional team** across engineering, design, and QA.
- Provide proactive delivery updates and insights to leadership, influencing **strategic decisions** and keeping stakeholders aligned.

- Led Agile ceremonies and backlog refinement, increasing team velocity by **30%**.
- Maintained **95% milestone adherence** through proactive risk management.
- Improved **player retention by 25%** through UI/UX feature improvements.
- Translated business goals into technical specifications and **structured execution plans**.
- Reduced project overhead by **15%** by implementing structured tracking systems.

PROJECTS

Skyborne Phoenix Flight (AAA MMORPG) Shipped large-scale seasonal features as part of a **50+ cross-functional team**, contributing to the live multiplayer ecosystem and ongoing content roadmap.

Skyborne Genesis (Web-Based Web3 Experience) Supported **launch and live iteration** of a browser-based Web3 product within the Skyborne universe that integrates NFT-driven progression and interoperable assets across the ecosystem.

RCADE Network (Decentralized Gaming Infrastructure) Shipped decentralized gaming infrastructure backed by a **40M+** venture ecosystem and supporting over **700K+ installs** and **US\$50M+ in in-game revenue**, positioning the platform as a foundational hub for future interconnected Web3 experiences.

Dastaan (Turn-Based Tactical RPG) Led a **30+** member cross-functional team through full product lifecycle from concept to launch.

Music Festival Tycoon (Simulation Game) Managed scope, timelines, and resource allocation to deliver product milestones aligned with strategic objectives.
